Continuation Sheet (PTO-303)

Application No.

Presponse to Applicants' remarks, Cavallaro 191 does not disclose that the addition of a mantle layer to golf balls will increase spin rate or decreasing spin rate but rather the object of Cavallaro invention is to provide golf balls with a mantle layer to control or optimize the spin rate, initial velocity, and feel (Col. 7, lines 29-33 and Col. 1, lines 60-63). It is known in the art that two-piece balls provide greater flight distance, but hard feel (Col. 1, lines 30-41) upon ball impact, which is undesirable; and wound balls provide good feel but shorter flight distance and more expensive to produce (Col. 1, lines 55-59). Thus, the addition of a mantle layer to the golf balls is to overcome the hard feel of the two-piece balls and increased manufacturing cost of the wound balls. There is no suggestion of providing a mantle layer in Cavallaro's golf balls will result golf balls having increasing spin rate or having increasing "trend" spin rate, or decreasing spin rate.
